## PROFESSIONAL SUMMARY

I have worked as a professional journalist for over 10 years, during which time I authored numerous reports, produced a documentary film, and led two significant media projects. Additionally, I have successfully managed live broadcasts during major events and possess the professionalism to handle any situation.

Participating in high-level events such as the Munich Security Conference, European Political Union summit in Prague, and Moldova, alongside international journalists, has enriched my experience. I gained valuable insights into the unique approach of one of the largest media outlets in the Middle East, Al Jazeera, during a conference they organized.

My extensive travels to more than 70 cities across about 30 countries have allowed me to participate in various media events and training programs. As part of the Europe on Air project in Madrid, we produced a substantial audio program with young people. Working for the Kyiv Post in Ukraine, I delved into the specifics of Eastern European society.

My time studying in Norway not only exposed me to Nordic countries but also connected me with colleagues from various non-EU countries. In Christiansand, I joined the Global Lounge, where we explored the languages and cultures of different countries, fostering connections with colleagues from Africa and Asia.

Additionally, visiting public TV stations in Norway and Denmark provided valuable insights into their TV traditions and allowed me to make new media friends.

---

**SKILLS**

During my stay in Georgia, we went to the most remote Azerbaijani villages and taught children technology and journalism skills, established conditions for them to cover the problems of their villages, and published them on various platforms. Although Azerbaijanis lived in the village of Khuldara, the village was both an unfavorable area and located on the border with Armenia. Every weekend we went to that village, taught students in the garage of a young man's house, and helped them to cover and solve problems in the village, such as early marriage, garbage, water and roads.
